

THE WORLD PREMIERE OF THE NEW PORSCHE 911 AT RUDOLPH HOUSE STUTTGART

The world premiere of the 2025 Porsche 911 was filmed at Rudolph House, Stuttgart, starring the first 911 GTS T-Hybrid and historical 911 models. Opposite the Rudolph House is the collectors' garage facing the piazza - a spectacular place for old and new dream cars.

PHOTO- AND VIDEOSHOOTINGS

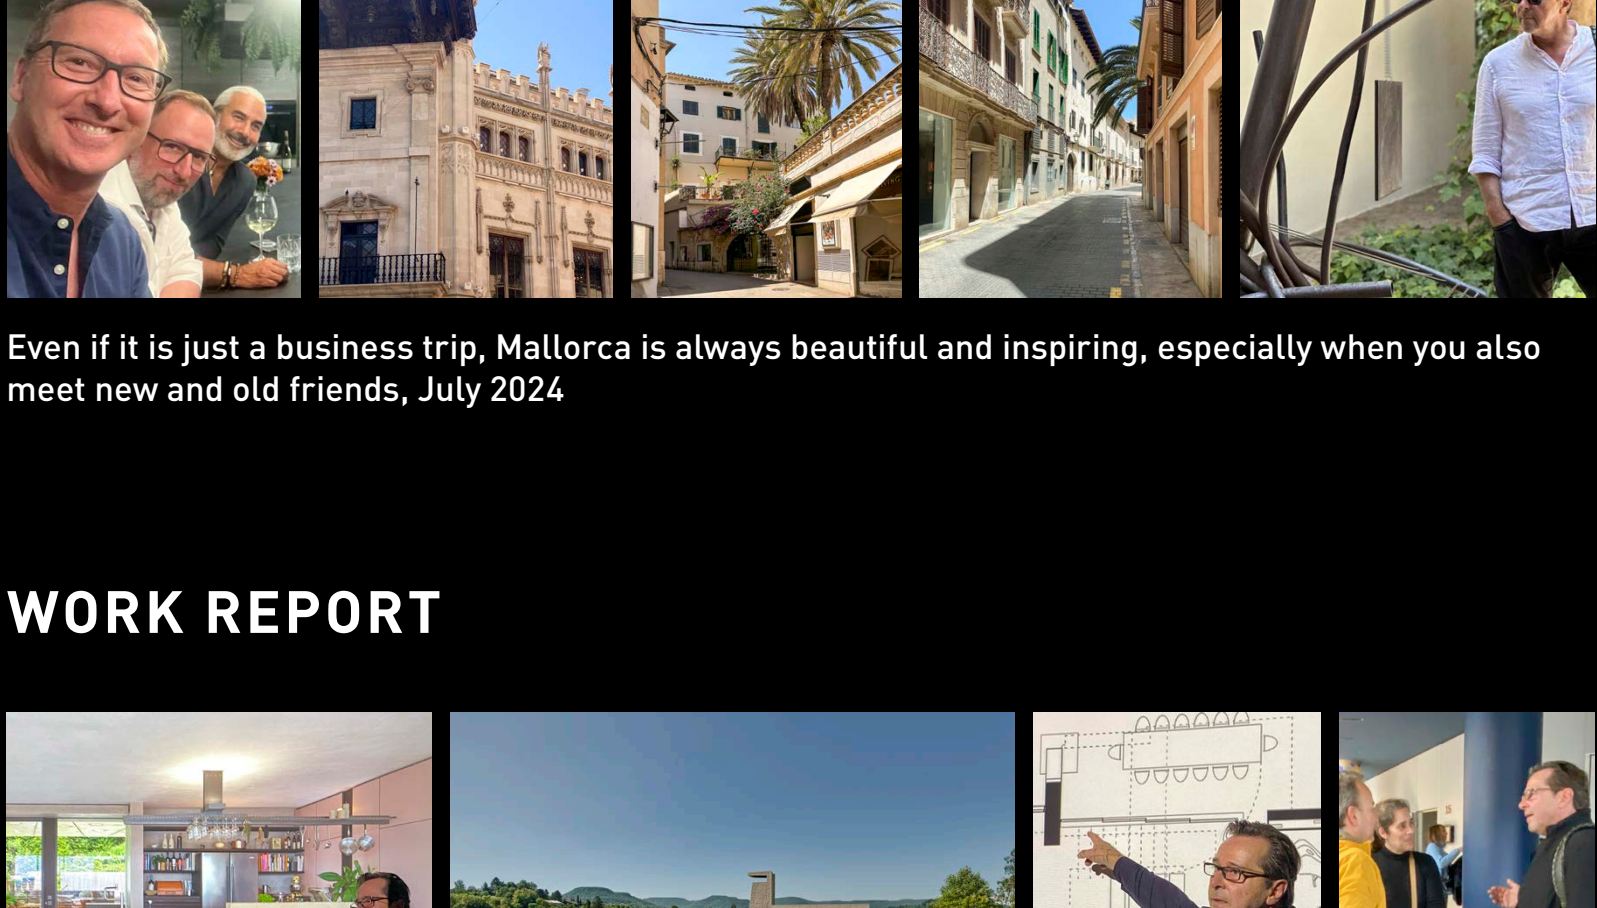

Thankful for being guests and our clients' hospitality at Parkside House. Working with our favourite photographer Zoëy Braun was exhausting, focused and yet full of joy.

After two postponements due to the lack of summer this year, we were finally able to do the photo shoot at Portus House in sunshine. Intense and hard work with Zoëy Braun and our fantastic team. A big thank you to our clients for their patience, their support and for wining and dining us.

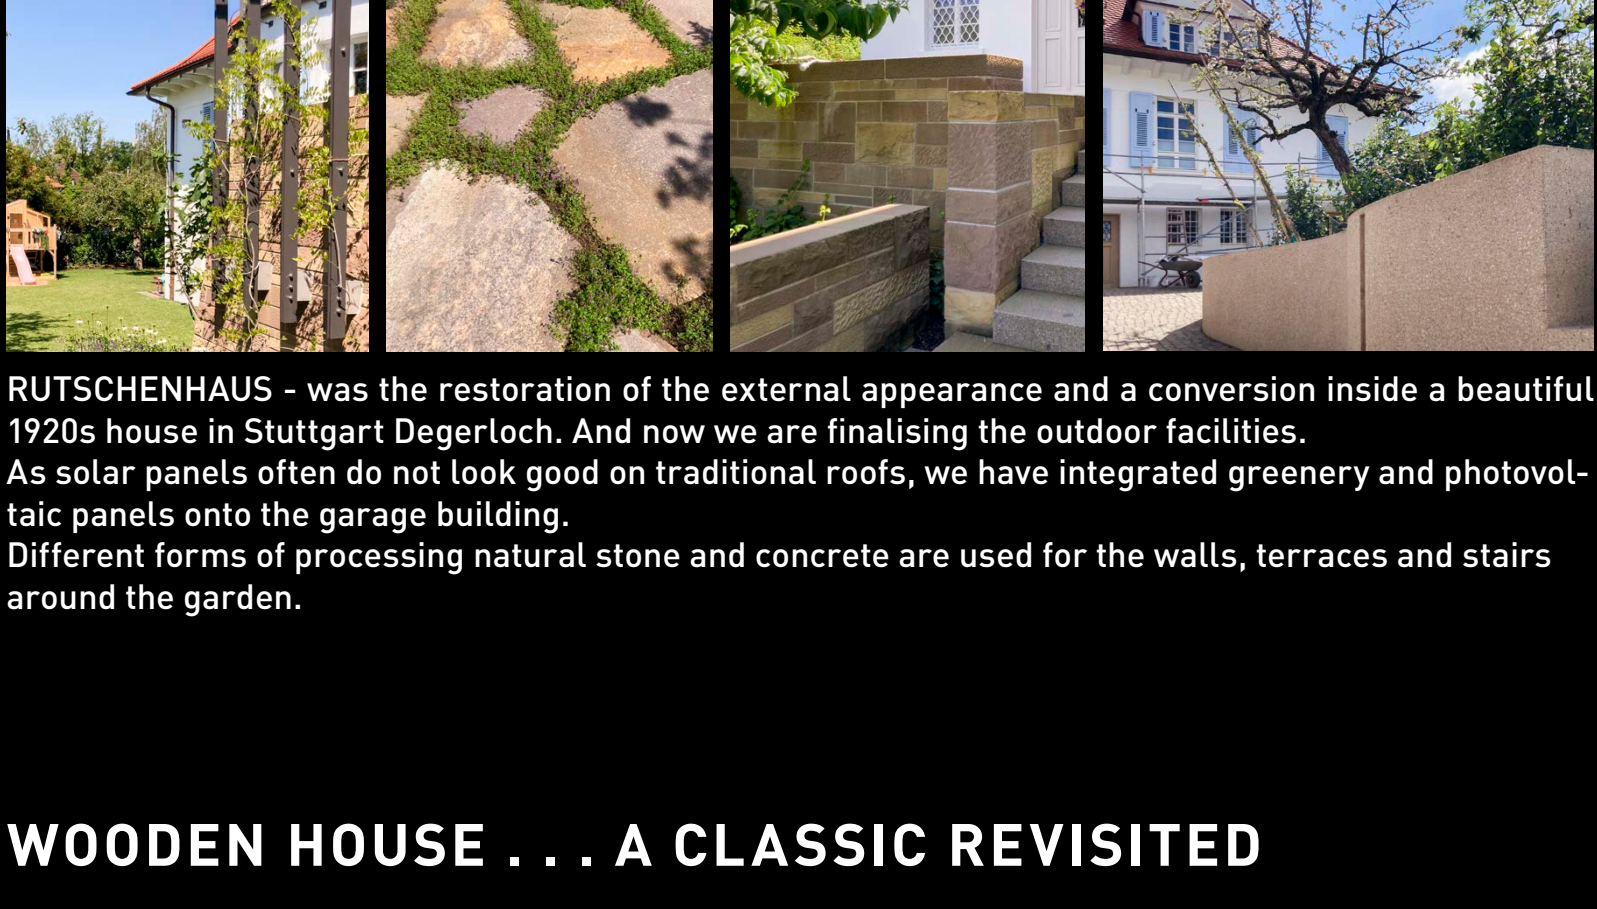

BUSINESS AND STUDY TRIPS ARE AN IMPORTANT SOURCE OF INSPIRATION FOR OUR WORK

Inspiring tour to art, architecture and nature on the island of Lanzarote, January 2024

What I love about this job is that it takes you to beautiful places in connection with possible projects. A lot of inspiring buildings in Tuscany and finally visiting one of my favourite buildings - Rocca de Mondavio (below right), May 2024

Even if it is just a business trip, Mallorca is always beautiful and inspiring, especially when you also meet new and old friends, July 2024

WORK REPORT

Work report "ZEITLOS UND DAUERHAFT - Das Haus als Ganzes", within the international Design fair BLICKFANG in the Liederhalle Stuttgart, March 2024

OUTDOOR FACILITIES IN COMPLETION . . .

RUTSCHENHAUS - was the restoration of the external appearance and a conversion inside a beautiful 1920s house in Stuttgart Degerloch. And now we are finalising the outdoor facilities. As solar panels often do not look good on traditional roofs, we have integrated greenery and photovoltaic panels onto the garage building. Different forms of processing natural stone and concrete are used for the walls, terraces and stairs around the garden.

WOODEN HOUSE . . . A CLASSIC REVISITED

House BOP - a residential sculpture, designed 22 years ago, with organic materials only. Unlike most of our buildings, this house was designed with a timber frame construction. Clay bricks in the ceiling act as accumulators. The walls are coated with clay plaster. One of our favorite carpenters sent us these two pictures of the house where he just delivered some of his work . . . We appreciate that the house is still in good shape :-)
